FEATURES AND BENEFITS

Flexible Hair Pomade is a micro-emulsion that provides flexible hold to the hair. **Cetiol HE** provides a light, water-soluble emolliency to the hair so it does not get dried out. The hold is provided by **Luviskol K 85 CQ Solution** as its high molecular weight PVP polymers provide great setting of the hair. The bright, neon green hue to the pomade is achieved by the natural extracts of **Siddha Medico Neer Pazchai** & this color remains stable through the use of **Tinogard TT**, a phenolic antioxidant that is highly effective in preventing degradation of products sensitive to oxidation. It is a superior alternative to BHT as it has a clean tox/eco-tox profile. **Cremophor A 25**, an oil-in-water emulsifier, holds this pomade together as it is a very efficient protective colloid and can increase the stability of dispersed systems.
